

Aarti has made a big change in my life by making me realise that not everybody is as lucky as me to

1. wake up in the morning
2. get ready
3. go to school with lunch
4. play with my friends
5. wear my pyjamas and go to sleep. You might think this is normal or even boring. When I saw that many children could not afford even one meal I started to talk about it to my friends at school. I made organic lip balms

I love art and when I saw my anna and akka asking for help, I thought I could raise money by selling my art. I painted glass bottles and earned 2500 rupees. I spoke with my friends and they were excited and so we started speaking to our school Principal and today my school is involved by contributing painting and drawing worksheets.

We, Rhea and Sanya (16) heard about Aarti Home and their effort to reach children impacted by COVID. We worked with my classmates to get 4678 worksheets and raised 1100 USD for relief kits. We realised that we were a part of something much bigger than ourselves.
